Flex-Soft (No-Cut)

No Cutting, No Weeding!

The Ultimate Flex/Vinyl alternative is finally here!

PRINT BLACK and GET WHITE,
METALLIC, NEON or

STANDARD COLORS!

Suitable for almost every standard Black/White or Color-, LED- / Laser-printer.

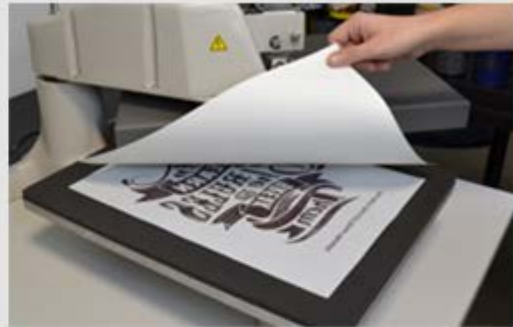

If you have a regular office printer working with toner (No Ink-Jet), you can produce self-weeding transfers in White, Metallic, Neon and Standard Colors, without any investment in a new printer or special toner and forget about cutting and weeding.

"The most annoying step, the weeding of the Flex/Vinyl foils, is no longer required with this new and innovative material."

1. PRINT

Print your file onto the colored A-Foil.

2. PRESS

Press the A-Foil together with the B-Paper LowTemp.

3. PEEL

Peel A & B media apart and see, that the white opaque adhesive of the B-Paper LowTemp transfers to the toner on the A-Foil. Your transfer is ready now.

4. IMPRESS

Press the A-Foil Transfer on your shirt and be impressed!
