The Clouds are starting to clear...

For more than **25 years** our products have been designed & developed in our Laboratory, before being produced in our Production Plant, with the highest demands for quality and usability.

Our **highest priority** is to provide our customers with the highest quality with the most consistent results.

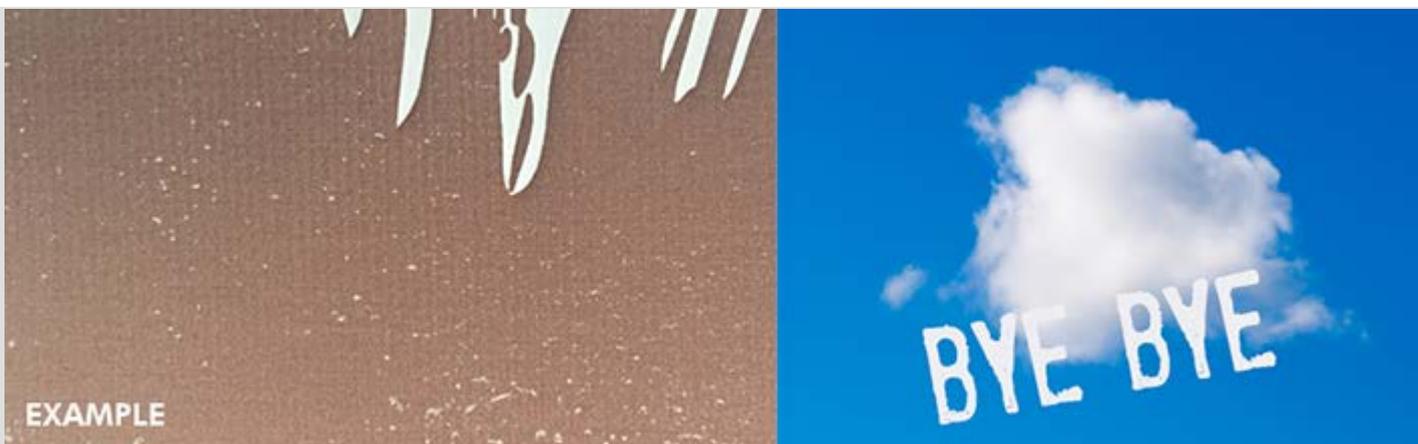

We place great importance on being able to solve occasional problems in the development of **Laser Dark (No-Cut) LowTemp.**

In this case, "**White Streaks**" are appearing on transfer presses with uneven closure of the plates. In combination with the use of high pressure these so-called "**White Cloud**" begin to appear.

The Solution is Easy!

When pressing, cover the A-Foil and B-Paper LowTemp with **5 sheets of standard copy paper (between 80-100 g/m²).**

The 5-Sheets of Copy Paper form a heat barrier, allowing the heat to build up slowly, which prevents the formation of clouds..."FOREVER".

EXAMPLE

Even if you have had no transfer issues until now, we recommend the use of the "5-Sheet Solution", in order to achieve even higher transfer tolerances.

TIP for bargain hunters:

Simply stick 5 sheets together with the help of our heat-resistant tapes. So you can reuse the sheets a thousand times over.

NEW FORMAT

Do you have an OKI ES9420WT / C920WT / PRO9420WT?
Would you like to create larger transfers?
Then we have just the thing for you!

FOREVER Laser-Dark (No-Cut) LowTemp A-Foil A3 XL

31.75 cm x 48.26 cm

OVERVIEW OF ALL FORMATS:

DIN A4

DIN A4XL

DIN A3

DIN A3XL

This format is already a standard feature in the latest version of the TransferRIP.

You can upload files like normal without having to change anything.

If you are not a **TransferRIP** user, you can still take advantage of this new size. In the printer driver of your white toner printer, you have the ability to specify a custom size (31.75 cm x 48.26 cm).

The same sized B-Paper Low Temp is already in stock!

Order now from your dealer!

FLEX-SOFT (NO-CUT)

Did you know...

...you can also use your OKI White Toner Printer with our FOREVER Flex-Soft (No-Cut) Foils?

Are you dissatisfied with the Black or Red from your OKI White Toner printer or would you like to transfer Neon and Metallic colors on to textiles?

Then use our Flex-Soft (No-Cut) transfer foils!

LEFT: **OKI WHITE TONER SYSTEM**
RIGHT: **FLEX-SOFT STANDARD COLORS**

With our Flex-Soft (No-Cut) Standard colors you can produce an even higher color intensity and opacity on dark colored textiles when comparing the color toners from OKI.

Apart from using different temperatures, the Flex-Soft (No-Cut) process is the same as Laser-Dark LowTemp (No-Cut). In both applications, the B-Paper LowTemp paper is used.
